

Marantz Business Electronics extends product accessibility in Germany

Marantz Business Electronics has appointed SmartRep to distribute its technologies in Germany, Hungary and Romania, extending the accessibility of its Automated Optical Inspection products for customers in this region.

Highly experienced in the field of inspection technology, SmartRep will supply a wide range of Marantz benchtop and inline AOI systems backed by its trademark comprehensive support package. With over nine years of dedicated Marantz knowledge, the SmartRep team is well equipped to advise customers on how to get the most out of their AOI technology. Optimised for the highest quality inspection accuracy for PCBs, including SMT and THT components, reflow and wave solder joints, and solder paste, Marantz AOI systems are a valuable addition to the SmartRep range. SmartRep's Andreas Keller explains:

“An established name in the field of inspection technologies, SmartRep has founded its successful reputation on concentrating on the very best products available today, designed to deliver exceptional results for our customers. Now incorporating world-leading state-of-the-art Marantz AOI systems, the SmartRep portfolio is now even stronger. We know that Marantz systems deliver the highest quality and flexibility for an unbeatable performance in today's high-mix manufacturing environments. Constantly evolving through hardware and software innovation, Marantz technologies are an important addition to the service we are able to deliver to our customers.”

Commenting on the partnership, Marantz Business Electronics General Manager, Henk Biemans explains: “We’re delighted to welcome SmartRep to our network of trusted distributors around the world. Having pioneered 24-bit defect detection, our range of AOI technologies deliver a premium performance for today’s manufacturers – which is why it’s vital that we partner with specialists who understand the precise needs of our customers and who can deliver the support and advice they need to achieve the highest quality. I’m confident that SmartRep will help us continue to drive powerful process control and maximum production yields throughout today’s industry.”

About Marantz Business Electronics

Well known for high quality Audio/Video products, Marantz developed its first AOI system in 1994. Developed to inspect PCB assemblies for correct component placement and soldering, the AOI system was designed for use in Marantz’s own factories. Proving to be a highly successful, cost-effective alternative to traditional human inspection, Marantz developed its first generation commercial system in 1996. With a steadily growing installed base, Marantz Business Electronics has now sold over 4000 units worldwide.
