

Marantz launches state-of-the-art iMentor training tool

Marantz Business Electronics has launched iMentor, a brand new training and support system designed to help new and experienced operators get the most out of the company's range of advanced AOI technologies.

Engineered to deliver the shortest programming times and best inspection results, iMentor substantially improves operator productivity for ongoing process optimisation.

A web-based tool that can also be used offline, iMentor represents a completely new training concept for Marantz customers. Incorporating step-by-step guidance supported by screen shots, iMentor users can easily set –up programs while navigating through easy-to-follow instructions. A useful 'Search' feature also enables users to input keywords to find corresponding articles from the online manual – completely removing the need for time-consuming paper searches. This function also enables users to search Marantz's 'Frequently Asked Questions' database, gaining immediate accessibility to helpful advice and information.

The intuitive new system also acts as a portal to the very latest Marantz product and company information. Featuring an informative front page that instantly alerts users about new software releases and MainStampLibrary updates, iMentor will be constantly updated to ensure users can rely on 24/7 access to the very latest programming information and advice.

“The launch of iMentor is exciting news for both us and our customers,” explains Marantz Business Electronics General Manager, Henk Biemans. “Having pioneered true 24-bit colour image processing that has revolutionised the field of AOI by

expertly detecting defects and minimising false alarms, it is essential that our customers have all the tools they need to make the most of this innovative technology. iMentor does exactly this, ensuring that all the information Marantz system users need is only a few clicks away. Delivering step-by-step instruction that minimises text in favour of clear illustrations, iMentor will ensure that Marantz customers experience substantial programming improvements for the very best inspection results.”

About Marantz Business Electronics

Well known for high quality Audio/Video products, Marantz developed its first AOI system in 1994. Developed to inspect PCB assemblies for correct component placement and soldering, the AOI system was designed for use in Marantz’s own factories. Proving to be a highly successful, cost-effective alternative to traditional human inspection, Marantz developed its first generation commercial system in 1996. With a steadily growing installed base, Marantz Business Electronics has now sold over 4,250 units worldwide.
